Projects

What is Happening in my City | [Github](#) | [Live Link](#)

- Developed a full-stack **Map-based Event Discovery** platform using **React and Leaflet.js** to visualize local happenings in real-time.
- Architected a responsive frontend with **Tailwind CSS**, ensuring seamless user experience across mobile and desktop devices.
- Implemented efficient state management and integrated external APIs to fetch and display dynamic event data based on geographical coordinates.

Hydra - A Hydration Companion App | [Github](#) | [App Link](#)

- Engineered a specialized web application to track and optimize daily water intake, built with a focus on **React functional components** and **Hooks**.
 - Integrated **local storage/database** persistence to maintain user progress and history, demonstrating a firm grasp of data lifecycle management.
 - Designed a clean, minimalist UI using **Tailwind CSS**, prioritizing accessibility and performance to ensure fast load times.
-

Work Experience

WordPress Developer Intern

DI Infotech Leaders Pvt. Ltd. | (Jan 2026 – Present)

- **Developed and maintained** a portfolio of responsive WordPress sites, reducing load times through asset optimization and clean layout architecture.
 - **Translated** designer wireframes into functional web components, maintaining strict adherence to UI/UX principles and brand guidelines.
 - **Streamlined** site communication workflows by integrating robust SMTP services and advanced form logic.
 - **Collaborated** with SEO specialists to implement technical on-page improvements, directly contributing to increased organic traffic.
 - **Resolved** critical technical issues and performed routine security audits to maintain high site integrity and data protection.
-

Education

Bachelor of Computer Applications (BCA) – IGNOU (Ongoing)
